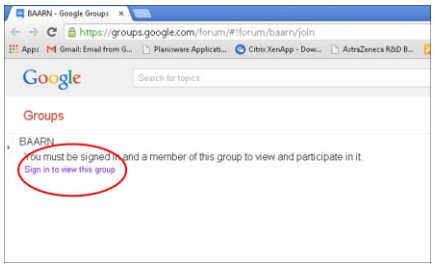
Joining the BAARN mailing list with a non-Gmail email account

To get the most out of the BAARN mailing list, you'll need to log in with a Google account. If you prefer to receive emails from the group using your Gmail account (i.e., personal email), just log in with gmail user id and password. If you'd rather receive BAARN emails in a different account (such as your work email), then follow these instructions:

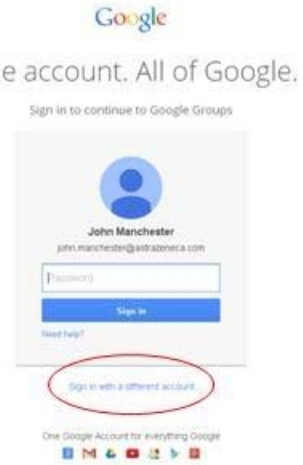
1. When you receive the BAARN invitation email, click the "Join This Group" button

2. This will take you to the BAARN Google Group page, where you'll need to log in. Click on "Sign in to view this group"

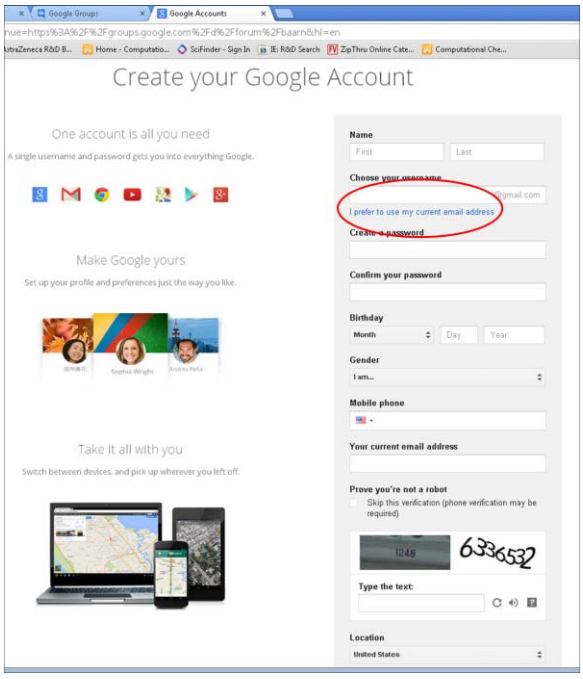
   


3. That will take you to the Google login page. If you already have a gmail account, Google will encourage you to log in with it as this point. You can join the group with that account, but all email from BAARN will go to your Gmail. If that's not what you wnat, then select "Add Account" :

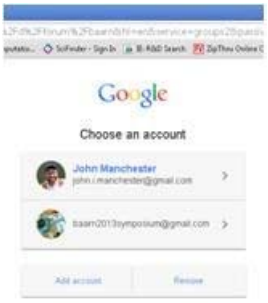
4. That will take you to yet another login screen. Click on the fine print, "Sign in with a different account". If you don't have a Gmail account, the fine print will read "Create account":

5. That will take you to an account creation page, where there's more fine print to click on (you're almost done!). Click where it says "I prefer to use my current email address":



6. Complete the rest of the form and click the "Next Step" button. A confirmation email will be sent to the email address you've just registered. Click on the confirmation link in that email, acknowledge that you've been confirmed, and finally you will arrive back at the login screen, with your new google account linked to your non-gmail email address:



7. All done! Now you'll have the ability to browse and search old messages and threads, in addition to sending and receiving email from baarn@googlegroups.com
